

SwapTracker

A decentralized app that provides you a simple and fast overview of your trades and de-fi wallets. Our goal is to provide simple, effective and user-friendly tools for your everyday de-fi activities.

Litepaper

The Market

More than 100 million people around the world are now using cryptocurrencies - and a growing number of baby boomers and Gen Xers are becoming interested in bitcoin and other tokens, according to two separate reports.

A report from exchange Crypto.com estimated that there were 106 million crypto users around the world in January 2021, following a 16% jump in participants that month alone.

A separate survey from financial advisory group deVere found 70% of its clients aged over 55 had already invested in digital currencies, or were planning to do so, in 2021, despite bitcoin and others being strongly associated with younger, millennial investors.

- Business Insider

Small crypto and de-fi investors are constantly growing and our mission is to provide simple, effective and user-friendly tools for their everyday de-fi activities.

The Problem

The main problem is that there is no way to fully track your profits and losses in real time; on each “trade” the investor must calculate everything manually. All this causes loss of time and energy.

No way to track all your profits and losses in real time after buying an X amount of any token on PancakeSwap and/or UniSwap

No unique dapp that allows you to exchange any token, track your trades and your wallets all in a single place

Beginners who are just starting trading tokens cannot find any user-friendly and intuitive software that allows them to use all the basic trading features

The Solution

SwapTracker provides you a simple and fast overview of your trades and de-fi wallets providing simple, effective and user-friendly tools for your everyday de-fi activities, all in a single place.

Our main features:

- Dashboard with overview and graphs
- Wallet tracker
- Trade tracker (with profit/loss)
- Internal exchange
- Farm and stake

Dashboard

After connecting the preferred de-fi wallet (such as MetaMask, Trust Wallet, Ledger Wallet, WalletConnect), the users will be able to access all the main informations such as wallet balance, last open trades, 24h profit/loss and a real-time graph counting the closed trades profits.

Wallet Tracker

SwapTracker is able to keep track of all the tokens contained in the connected wallet. Users are able to change network (ETH or BSC) and the FIAT currency with the upper-right dropdown menus.

Trade Tracker

Calculating the token profits and losses manually is just a waste of time, let us do all the work for you. SwapTracker keeps track of all trades made on our internal BSC and ETH exchange and displays the real-time updated profits and losses. Users are able to click on "CLOSE TRADE" to be redirect to our internal exchange and sell automatically the amount previously bought.

The screenshot displays the SwapTracker interface. On the left is a sidebar with navigation options: Dashboard, Wallet, History (selected), Trade, Staking, and Tiers. The main content area is titled 'History' and shows a table of trades for the period 'SEP 01, 21 - SEP 23, 2021'. The table includes columns for Token Symbol, Token Name, Current Value, Open At, Current Price, P/L, P/L %, Open Date, and Closed Date. A 'Hide closed Trades' toggle is visible in the top right of the table area. The user's profile information at the bottom left shows a wallet address '0x39...Ed24FFE186F' and a 'PRO' tier.

TOKEN SYMBOL	TOKEN NAME	CURRENT VALUE	OPEN AT	CURRENT PRICE	P/L	P/L %	OPEN DATE	CLOSED DATE

Exchange

After choosing the preferred network, SwapTracker will allow users to swap any token on our internal DEX, which mirrors the standard PancakeSwap or UniSwap exchanges. Each amount bought on our exchange will be recorded on the "history" section as an open trade.

SWPT Token Utility

The SWPT token utility is directly related to the user software usage. Users are able to use SwapTracker just by holding an amount of SWPT token. The 3 tiers all have the same features available, but with different commissions. Commissions are paid by users on each trade open using our internal exchanges.

Starter

Must hold 1.000.000 SWPT in your connected wallet

All features available 1% transaction fee

Advanced

Must hold 5.000.000 SWPT in your connected wallet

All features available 0,5% transaction fee

Pro

Must hold 10.000.000 SWPT in your connected wallet

All features available 0% transaction fee

Supported Chains

SwapTracker will operate on the currently two most used trading chains: BSC (with PancakeSwap exchange integration) and ETH (with UniSwap exchange integration).

Roadmap

Litepaper release and distribution
Platform design
Farm and staking
Public sale through IDO
First stages development
Online community building
Liquidity locked
PancakeSwap Listing

First BETA release on ETH network
with MetaMask integration
ETH internal exchange development

ETH network development final release

Q4 2021

Q1 2022

Q2 2022

Q3 2022

Q4 2022

2023

First BETA release on BSC network
with MetaMask integration
BSC internal exchange development

BSC network development final release
Loyal tiers creation
Trust Wallet integration
Ledger Wallet integration
WalletConnect integration

Research and development
on other networks
